**The Armadillo core is made from 100% post-consumer recycled material.**

Rhino Deck uses nearly half a billion plastic containers each year in our manufacturing process. We use a proprietary mix of wood fiber and high-density polyethylene plastics (HDPE), like milk jugs and detergent bottles.

Beauty  
is only skin deep...

**Luckily, this is  
Armadillo skin.**

# Easy on the eyes, **tough as nails.**

## Introducing Armadillo™, a new breed of composite decking from Rhino Deck®

Rhino Deck has always had a reputation for producing high-value low-maintenance decking products with a heart of green. None of that has changed. Our Armadillo product line offers the same 100% recycled content of our traditional decking products but with improved color fastness, stain resistance and a more realistic appearance. If you're looking for a composite decking product that will make you forget it's a composite... get your hands on Armadillo.

## Composite decking has never looked better.

Armadillo's "hardshell" is permanently fused to its composite core. The unique composition of the outer layer provides better control over pigmentation, resulting in denser, richer color, more variation and a more realistic look.

## A lot like wood... but a whole lot better.

Armadillo's rich, deep color gives you all the warmth and appeal of wood, but with much less of the maintenance. Armadillo's super hard exterior naturally shrugs off scuffs and stains and stands up to the damaging effects of the sun. Keeping your deck looking its best requires little more than a little light sweeping. Generally, most dirt and grime can be removed with a garden hose, soap and water. When shoveling off snow, use a plastic shovel to avoid gouging the finish.

## An Armadillo deck is not as exotic as you think.

For those interested in building their own deck, Armadillo Deck boards cut and drill with standard wood working tools. Carbide tipped tools are recommended. Your Armadillo deck is more than just a great deck, it's part of your living space. To give that space a beautiful fastener free surface, we recommend our clip system.

Each clip is preloaded with a screw for a quick and easy installation. For a complete installation guide please visit our website at [www.armadillodeck.com](http://www.armadillodeck.com). Remember to research your local building codes before you begin your project.

Use our Rhino Deck/Armadillo End Board Sealer on the cut ends of the boards to reduce exposure to the elements.

*Just like a Rhino! Armadillo's tough exterior is built to stand up to years of inclement weather, harsh sunlight and entertaining.*

## Finishing touches

In addition to deck boards in 12, 16 and 20 foot lengths, Armadillo's super tough finish is also available on coordinating railings and post sleeves. Ask your dealer for details on color and style availability.

Armadillo's super-tough composite railing system accommodates glass, wrought and traditional balusters from Deckorator, Fortress and many others.
