

CULPEPER AQUA SHIELD

CULPEPER AQUA SHIELD WATER REPELLENT WILL TAKE YOUR DECK TO THE NEXT LEVEL OF PROTECTION.

Culpeper Aqua Shield is a wax based water repellent that is infused in the wood during the treatment process at the factory. This process ensures water resistance for all four sides of the board and gives you a head start on protecting your deck. This process protects your board from the adverse effects of water and the elements on all four sides, and gives you a head start on enjoyment.

BENEFITS:

- No need to apply water repellent immediately after installation.
- Minimizes cracking, warping and twisting due to swelling and shrinking from weather cycles
- More water repellent protection than typical brush-on treatments.
- Lifetime limited warranty against rot, fungal decay and termite attack.
