

# AQUA SHIELD

## FACTORY-INFUSED WATER REPELLANT FOR SUPERIOR MOISTURE PROTECTION

Aqua Shield water repellent provides the ultimate moisture protection for your treated lumber deck. Unlike brush-on sealants, wax-based Aqua Shield water repellent is deeply infused into the lumber during the treatment process at the factory. The result is decking that is protected from water on four sides of the board, maintaining a high degree water resistance for the life of your deck.

### FEATURES AND BENEFITS

- Wax-based water repellent infused at the factory
- Moisture protection on four sides of the boards
- Eliminates need to apply water repellent after installation
- Minimizes potential for board cracking, warping, and twisting due to weather cycling
- Superior water protection than brush-on treatments
- Lifetime limited warranty against rot, fungal decay, and termites
